# JAMES DAVEY

San Francisco, CA james.t.davey@gmail.com (415) 307-8703

Digital Accessibility Expert (DHS Trusted Tester) skilled at simplifying complex accessibility concepts and guiding teams to implement practical, effective solutions. Extensive experience in front-end web development and WCAG conformance, with a strong focus on enabling developers and designers to build accessible, user-friendly interfaces.

## WORK EXPERIENCE

1/2026 - Present **Apple, Web Accessibility Engineer (Contract)**

- Write design reviews and engineering requirements for projects across the high-traffic Apple Online Store, upholding Apple's high standards as a global leader in accessibility.
- Act as a liaison between engineering, design, and content teams to resolve complex issues and incorporate accessibility into product development.
- Prioritize and provide remediation guidance for a high volume of accessibility issues, using internal Apple tools to track work and deliver clear code and design recommendations.
- Write and review production code, open pull requests, and review accessibility fixes submitted by other developers.

6/2022 - 9/2024 **Paramount, Senior Accessibility Architect (Contract)**

- Led accessibility remediation efforts and created comprehensive requirements for Pluto TV's Web, Roku, and Android TV platforms, achieving significant improvements across new and existing components.
- Managed backlogs and led meetings with stakeholders to prioritize and resolve accessibility bugs and tasks.
- Defined and documented new text-to-speech standards, improving screen reader experiences across multiple TV platforms.
- Oversaw accessibility compliance for Paramount's extensive network of refreshed brand sites, including MTV, Showtime, Nick, and several others.

8/2021 - 5/2022 **Lunchbox Technologies, Senior Accessibility Engineer**

- Managed a large backlog of accessibility-related Jira tickets, providing detailed descriptions and solutions for engineering teams.
- Planned and executed remediation for high-priority sites, evaluating defects by impact, severity, and visibility across platforms.
- Wrote and pushed React code to fix accessibility issues, working directly with teams to get fixes deployed.

1/2021 - 7/2021 **CVS Health, Accessibility Engineer Lead (Contract)**

- Coordinated and executed accessibility testing, remediation, and educational initiatives across multiple internal product teams.
- Improved accessibility in the component library by advising designers, supporting developers, and writing usage guidelines for inclusive applications.
- Established and enforced internal standards for accessible data visualization, including grids, charts, graphs, and data tables.

3/2019 - 1/2021 **Level Access, Senior Accessibility Analyst**

- Performed comprehensive accessibility audits to ensure compliance with legal standards, guiding organizations to minimize digital risk.
- Managed long-term projects and cultivated strong client relationships, resulting in significant sales growth and service renewals.
- Authored VPAT documents and conducted training sessions for developers and designers across Fortune 500 companies.
- Served as an Accessibility Design Specialist on a Kaiser Permanente contract, conducting in-depth design reviews for high-traffic web components and guiding UX teams on accessibility best practices.

## EDUCATION

**University of California, Davis**
